

This is an example of a CRUD that i realize using Python,Mongo DB Atlas, Flask and HTML

The objective is to know the tools and the things that we can develop using this tools, above are being showed 2 pictures:

- 1) How the interface looks
- 2) The data stored in the cloud using MongoDB Atlas

The code was commented as much as possible to be able to clearly understand how is working.

APP API-REST PYTHON - FLASK - MONGODB By Paul Manriquez
