

This is a short example using Python/MySQL/Matplotlib:

The objective is to get the data from the data base that contain the names and certain rank number to each name, this rank number can represent, the age, the account in a bank, the height of each person, etc., but with the advantage that it is display in a graphical mode using Matplotlib library.

ID	First Name	Last Name	Rank	Age
0	Kevin	Samstrom	12	32
1	Jefferson	Gutierrez	8	17
2	Harold	Carranza	2	55
3	Sebastian	Alvarez	4	12
4	Alvin	Sanchez	11	22
5	Jordi	Martinez	11	43
6	Ashley	Valentine	23	11
